

DEKALB® SMART DIGITAL TOOL

03-Jan-2018

The new DEKALB® SMART digital tool turns data into results, helping you to get most out of each DEKALB® corn seeds, optimizing resources and increasing yield for each of your fields.

WHY DO YOU NEED?

DEKALB® SMART PLANTING RECOMMENDATIONS

Increase the profit of every field with right planting density recommendations for your DEKALB® Corn.

30% of your yield potential depends on choosing the right hybrid and planting at the right density.

* By inputting information about your fields, such as soil type and environmental conditions, you can see:

- DEKALB® corn seed quantity guidance
- DEKALB® corn planting density recommendations

**University of Illinois Crop Physiology Science*

DEKALB® SMART FIELD HEALTH

Identify which areas of your fields are underperforming at a glance, determining where you should spend your time and attention. Using satellite technology, the tool identifies underperforming areas of your fields, allowing you to address small problems before they become larger ones. Because preventing issues is simpler than curing them. Whether your fields are being affected by pests, disease or weather, you can discover trouble spots early enough (perhaps even this season) to give that area special attention.

DEKALB® SMART IRRIGATION Powered by AQUATEK

Irrigation can account in some cases a third of corn operating costs, so optimizing your irrigation is critical for avoiding costly inefficiencies. Without entering any data you can get a clear picture of your water consumption on irrigation or rainfall forecast for the next seven days and even a snapshot of what it was yesterday to help you on the decision on how much to irrigate. If you take advantage of the full irrigation guidance, you can learn;

- Days until water stress
- Soil moisture depletion forecast

DEKALB SMART tool will be available to growers under 3 different packages to register for in 2018;

FREEMIUM

DEKALB® CORN PLANTING DENSITY RECOMMENDATIONS

GOLD

DEKALB® CORN PLANTING DENSITY RECOMMENDATIONS

CORN FIELD HEALTH MONITORING

CORN WATER USE MAPS AND FORECASTS

PLATINUM

DEKALB® CORN PLANTING DENSITY RECOMMENDATIONS

CORN FIELD HEALTH MONITORING

CORN WATER USE MAPS AND FORECASTS

SUPPORT ON WHEN AND WHERE TO IRRIGATE CORN FIELDS THROUGH SOIL MOISTURE DEPLETION FORECASTS

★ Gold and Platinum packages are for free till 24th June 2018.
